| ESTIMATED VALUE RANGE OF PROPERTY | LOV | v | | HIGH |
| | | | | |
| | | | | |

An automated valuation model estimate (Estimated Value) is a statistically derived estimate of the value of the subject property. An Estimated Value must not be relied upon as a professional valuation or an accurate representation of the market value of the subject property as determined by a valuer. The confidence gauge indicates the probability that the estimated value is correct within 20% of the predicted value.

Suburb Demographics

average household income range R85,000 - R115,000

NUMBER OF ADULTS

predominant LSM

PROPORTION PROPERTY DEBT

| LOW | CREAM-OF-THE-CROP |
|-----|-------------------|
| | |

Higher scores indicate that this suburb likely has a lower percentage of total home Rand value tied up in home loans.

Lower scores indicate that there is a greater proportion of Rand value tied up in property debt.

Higher scores are more desirable since these are as will be more stable and owners in the area have equity in their property value.

DEMAND

Higher scores indicate that this suburb likely has a good number of recent property sales.

Lower scores indicate that the property has a slower turnover of property sales compared to other suburbs in the country.

Higher scores are more desirable since they indicate demand for property in the area. This metric should be interpreted in combination with the others, particularly house price growth since some areas may have a high number of sales due to residents selling low to get out of the area.

HOUSE PRICE GROWTH

LOW CREAM-OF-THE-CROP

Higher scores indicate a higher likelihood that property values will grow at a higher rate than the national average over time.

Lower scores indicate that the property values in the suburb will grow at a rate lower than that of the national average over time.

ACCESS TO AMENITIES

| LOW | CREAM-OF-THE-CROP |
|-----|-------------------|
| | |

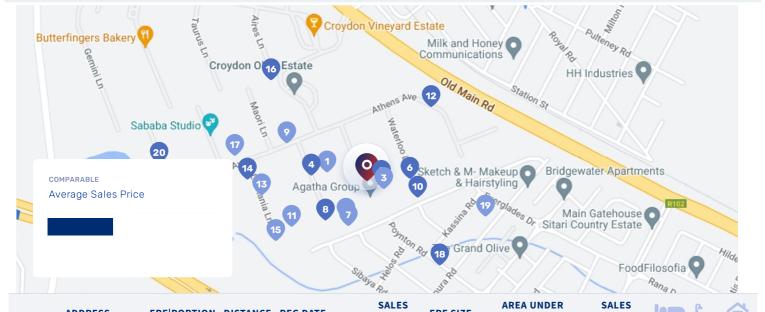

Higher scores indicate that the suburb likely has better access to amenities such as universities, the Gautrain, beaches and other attractions.

Lower scores indicate that the suburb likely has less access to attractive amenities for example in outlying areas where being remote is an attractive attribute of the suburb.

Proximity to amenities is a benefit to a potential buyer who is interested in the convenience that proximity to amenities holds and tend to lead to higher property values.
